DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, and 18-20, drawn to install power supply at customer premises, classified in class 379, subclass 413.
 - II. Claim 17, drawn to monitor the status of telephone lines when is off or on-hook, classified in class 379, subclass 377.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention I describe to install the power supply at customer premises. The subcombination has separate utility such as the invention II describe how to monitor the status of telephone lines when is off or on-hook.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
